CLIMATE SURVEYS

Climate Surveys are a tool that helps our clients understand and measure employees’ perception about everything related to their work (supervisors, coworkers, installations, procedures, communication, business culture, mood, work load, salary, etc.).

With the information obtained from the Climate Survey we will be able to understand what really happens within the company so that we can make the right decisions and take the right actions.

At P&A we are experts in Climate Surveys. Our clients look for an external company with expertise in this type of tools in order to carry out the complete process. This makes survey participants feel safer since they will remain anonymous.

PERSONALIZATION

Climate Surveys are customizable to the needs, competency models, culture and preferences of each company.

CLIENT’S PROFILE

Climate Surveys are aimed at companies of all sizes and all sectors.

LANGUAGES

Climate Surveys can be taught in Spanish, English, French and Portuguese.
¿WHY P&A?

- We have a technical team with a high degree of knowledge and proven experience in important national and international companies.
- We apply a modern and proven methodology, developed by our technical team and our international partners.
- We work so that our clients achieve significant competitive improvements, improve execution and with it the results.
- Our programs are based on extensive international research and studies, successfully tested and experienced in organizations from all geographic and sectoral fields.
