LEADERSHIP SPEED

We are witnessing an acceleration process in process management. This is forcing companies to be more dynamic, in other words, to respond quickly to social changes. They frequently find out that their slow pace of work slows down the company’s adaptation rate.

The Speed program, leadership speed, incorporates the organization’s needs to identify ways to improve speed and the ability to do things right.

We will help each participant:

- Discover how speed and quality impact leadership’s effectiveness.
- Discover tools and concepts that help leaders increase their speed as well as the speed of their teams while keeping high quality standards.
- Use the cross-training approach to create a personal development plan that allows an improved leadership speed.

CUSTOMIZATION

Leadership Speed can be customized to the needs, skill models, culture and preferences of each companies and can be linked to their performance, career and/or talent systems.

PARTICIPANT’S PROFILE

Leadership Speed is aimed at leaders of all levels, from senior executives to mid-level managers.

LANGUAGES

Leadership Speed Leader can be taught in 12 languages and 38 countries.
According to Leadership Excellence, founded by Warren Bennis, Ken Shelton, Stephen Covey, Ken Blanchard and Charles Garfield, Zenger Folkman Co. has been recognized for the last 14 consecutive years (2006/2019) as the leading independent firm for coaching and leadership skills development in the US.
