THE SIX LEADERSHIP LEVERS

Our partner Zenger Folkman analyzed data from over 1 million 360° assessments of over 75,000 global leaders and discovered that there are six critical skills used by those whose business results are extraordinary. They are called “leadership levers”.

By building strengths only in three of these levers, you can be boosted to percentile 90 of all global leaders. This is the power of the Six Leadership Levers.

We will help each participant:

• Make the connection between their organization’s needs and the skills that they are good at and passionate and motivated about.
• Focus on developing their strengths as the best and fastest way to increase their leadership effectiveness.
• Create a development plan in order to become highly competent in at least one of the six leadership levers.
• Use Zenger Folkman’s cross-training approach to exponentially increase their leadership skills.

CUSTOMIZATION

The Six Leadership Levers can be customized to the needs, skill models, culture and preferences of each company and can be linked to their performance, career and/or talent systems.

P- PARTICIPANT’S PROFILE

The Six Leadership Levers The Extraordinary Leader is aimed at leaders of all levels, from senior executives to mid-level managers.
